## AMENDMENTS TO THE CLAIMS

Claims 1-7 (canceled).

Claim 8 (currently amended) A method of inhibiting  $\alpha$ v $\beta$ 3 and/or  $\alpha$ 5 $\beta$ 1 integrin ligand-mediated cell-cell interaction, comprising:

contacting the cells with an antibody directed against a peptide consisting of SEQ ID No. 41 or consisting of SEQ ID No. 2 that is derived from a cell surface vascular endothelial growth factor and type I collagen inducible protein (VCIP) consisting of SEQ ID No. 13, wherein said contact with the antibody blocks binding of  $\alpha$ v $\beta$ 3 and/or  $\alpha$ 5 $\beta$ 1-integrins to the cell surface vascular endothelial growth factor and type I collagen inducible protein (VCIP), thereby inhibiting the  $\alpha$ v $\beta$ 3 and/or  $\alpha$ 5 $\beta$ 1 integrin ligand-mediated cell-cell interaction.

Claims 9-13 (canceled)

Claim 14 (previously presented) The method of claim 8, wherein said cell-cell interaction contributes to inflammation or angiogenesis.

Claim 15 (previously presented) A method of inhibiting tumor growth, inflammation and/or angiogenesis in a patient, comprising:

administering to said patient an antibody directed against a peptide consisting of SEQ ID No. 41 or consisting of SEQ ID No. 2 that is derived

from a cell surface vascular endothelial growth factor and type I collagen inducible protein (VCIP) consisting of SEQ ID No. 13, wherein said antibody blocks binding of  $\alpha v\beta 3$  and/or  $\alpha 5\beta 1$  integrins to the cell surface vascular endothelial growth factor and type I collagen inducible protein, thereby inhibiting tumor growth, inflammation and/or angiogenesis in the patient.

Claims 16-31 (canceled)

Claim 32 (previously presented) A method of inhibiting angiogenesis and the formation of capillaries in a patient in need of such a treatment, comprising:

administering to said patient a pharmacologically effective amount of an antibody directed against a peptide consisting of SEQ ID No. 41 or consisting of SEQ ID No. 2 that is derived from vascular endothelial growth factor and type I collagen inducible protein (VCIP) consisting of SEQ ID No. 13, wherein said antibody inhibits  $\alpha v\beta 3$  and/or  $\alpha 5\beta 1$  integrin-mediated cell-cell interaction, thereby inhibiting angiogenesis and the formation of capillaries in the patient in need of such a treatment .

Claims 33-41 (canceled).
